"SMART GRID"

A Vision of a New World in Electricity

Don't Miss It – May 21st

"Smart Grid" represents one of the fastest growing buzzwords in the energy sector. Local leaders and electricity-minded businesses have an opportunity to hear forward thinking Paul Grod, share information about what a Smart Grid is, what it will mean to the electricity industry in Ontario and what it will do for our community and your business. It is timely that **Paul Grod, President & CEO of Rodan Energy**, will be making a rare local appearance as the Key Note Speaker at Cambridge and North Dumfries Energy Plus Inc.'s Annual General Meeting. Rodan Energy has earned a reputation as a leading company delivering integrated energy solutions.

As a company of influence in the electricity industry, Rodan Energy is making significant progress in enhancing power system reliability and price responsiveness in today's green energy sector. Grod is respected for his open and informative talks that focus on the challenges and opportunities of moving to a modern electric system – a smart grid.

This meeting may prove to be the "smartest hour" of your week
